

Apex.AI

Apex.AI expands Germany presence in Berlin

With Tesla's Gigafactory, in the outskirts of the German capital, Volkswagen's software subsidiary Carmeq and Daimler's MBition, Berlin's importance as an innovative automotive location is growing. As the third-largest producer of automobiles after Japan and the U.S., the German government just laid out a \$5.9 Billion plan to foster autonomous driving. Automotive suppliers such as Bosch, HELLA and NVIDIA benefit from these funds and already established their branches in the German capital.

Now Apex.AI is taking advantage of the given infrastructure and is significantly expanding the team of their Berlin office just a few months after its founding.

Michael Pöhl, who joins Apex.AI from one of the world's largest Tier 1 automotive suppliers leads an experienced team of 7 new software developers to develop the automotive middleware, called "iceoryx". Iceoryx will enable efficiency and secure real-time processing of data in Advanced Driver Assistance Systems (ADAS) and Autonomous Driving (AD) systems.

After the successful cooperation with TÜV Nord in the certification of the automotive operating system Apex.OS, the safety standard of iceoryx, are also to be certified according to ISO 26262 so that the middleware can be used in series production in cars.

Apex.AI was founded in 2017 by Dr. Jan Becker, PhD and lecturer at Stanford University in Palo Alto to build robust, reliable, safe, secure, and certified software for autonomous mobility systems. As part of The Drivery, one of the largest innovation incubators focusing on mobility, Apex unites with more than 120 partners from young companies to well-known industry giants. The Drivery is Europe's largest mobility innovation community & marketplace which grants easy access to optimized workspace and a relevant network. With strengthening their Berlin office, the Silicon Valley headquartered innovator is pushing autonomous driving also in Europe while using the remarkable infrastructure of the German capital.

If you are interested in becoming part of the Berlin ecosystem and wish to enjoy access to a unique infrastructure of startups, research & development and international corporations, we'd love to hear from you.
